ABOUT THE COMPANY:

PAD Printing Services was established during post pandemic last September 2020 wherein PAD means Prints And Designs. It was founded by a couple who lost their job opportunities because of pandemic. An IT expert (Patrick Ian Cruz) and event singer (Catherine Pad Cruz), the founders worked hard to give the best quality printing services and be the first and best signage maker in San Juan, Batangas. It was also their objective to help other people from San Juan, Batangas to have a job that doesn't require them to go away from their families. As of now PAD Printing Services is turning 3 years and has already more than 15 employees and can now cater all in one advertising services from designing to building signages and printing of marketing materials from small to large and corporate businesses nationwide. PAD also adapts to the fast innovation of technology by regulary reasearching and developing equipment that will benefit the quality and efficiency of every project they make. It is a proud user of Roland Printers that are manufactured in Japan which we all know that quality is their top priority which is the same with PAD. Some of it's big clients are Jollibee, Chowking, Zagu, Chinabank, Philhealth, Megaworld and many more. PAD is also ready for any accreditation documents needed, it also a member of PhilGEPS.

MISSION:

To deliver the highest quality service at competitive prices and to provide sustainable jobs to the local community of San Juan Batangas.

VISION:

We envision to be the best signage maker and printing services in the province of Batangas and in the Philippines.

-We use made in Japan equipment to maintain quality service.
